

## Product Data

# Driwall™ Protection Board

A Waterproofing Protection and Drainage Mat

## Description

Driwall™ Protection Board is a waterproofing protection and drainage mat that is used after applying the waterproofing membrane to exterior foundation walls to prevent damage when backfilling.

Driwall™ Protection Board provides great drainage around foundations while eliminating the need for expensive, free-draining backfill.

Driwall™ Protection Board is 0.125-inches thick, 4 feet wide, and comes in a 200 square foot roll. After protecting your basement's waterproofing, it is essential to drain the soil around your foundation. Driwall™ Protection Board does this by eliminating hydrostatic pressure. Its open structure provides room for ample drainage while a non-woven fabric separates soil from the water, allowing the water to move away for the foundation through the drainage pipe.

The product is flexible for easy installation, but the tough recycled core can withstand the worst backfilling conditions.
