Doorway Transition Detail Between Rooms with and without Quiet Qurl®

1. Transition detail to be used in doorway transitioning from a room with Quiet Qurl (I.e. Hard Surfaces) to a room without (I.e. Carpeted Finish).
2. In addition a strip of reinforcement may be added to the 12" of Quiet Qurl extended into the non-matted room.

**Notice to Specifiers, Contractors & Architects:**

These technical drawings are offered as representative results with laboratory conditions. Field results will vary depending upon many factors outside of Keene Building Products™ control including but not limited to installation, lighting design, plumbing design & methods of construction. Keene Building Products Incorporated cannot assume any liability for the manner of installation of its products, which manner is left to the buyer in conjunction with the buyer's construction documents.

**QUIET QURL** is a component in an overall floor/ceiling assembly. Its performance is affected by every other component and the likelihood of achieving code compliance is contingent upon many other trades including framers, plumbers, drywall contractors to name a few. Developers and general contractors are responsible for building properly and testing field performance as soon as possible in order to assure the reliability of the project.

**WARNING:** Laboratory tests are not a guarantee of field performance because of the issues noted above and many other design errors that may occur. Please consult a professional acoustical consultant to assure plans are proper and that the floor/ceiling assembly can perform to expectations.
