

HYDRODRY® featuring Driwall™ Rainscreen

Keene Building Products In Partnership with AMICO

ABOUT

HYDRODRY® is a unique self-draining, vented wall system that works by creating a defined drainage and ventilation cavity behind fiber cement siding, veneer stone, stucco, and various other exterior claddings. A series of unique profiles allow water to drain from within the wall cavity. The remaining water vapor is then allowed to evaporate and escape through the E-Z Vent system located at the top of the wall.

Other rainscreens on the market can allow water to flow down the wall, but they fail to provide a suitable escape from the bottom of the wall. Partnered with AMICO combined with our Driwall™ Rainscreen product line, this unstoppable, patented solution allows water to drain freely from the bottom; and a top vent allows vapor to escape from the top of the wall.

If you are looking for a cost-effective way to combat or remediate water absorption in new construction, then we can help. We would embrace the opportunity to sit down with your team and demonstrate to you the HYDRODRY® system.

Driwall™ Products that integrate with the AMICO HYDRODRY® System:

Driwall™ Rainscreen | Exterior Wall Drainage Mat

Driwall™ Rainscreen is a drainage mat for exterior wall systems. The product eliminates incidental moisture problems in most exterior veneer applications.

Applications Include: Stucco, Lap Siding, Siding applications, Thin stone or brick, Manufactured stone, Stone & brick masonry

Driwall™ Rainscreen UV | For Long-Term UV Resistance

Driwall™ Rainscreen UV is a drainage mat with long term UV resistance for exterior wall systems. The entangled net product has UV stable fabric and strength bars to increase compression resistance.

Applications Include: Wood Siding, Metal Panels, Open Joint Cladding, Fiber Cement Board Siding

Easy-Fur™ | Rollable Furring Strip

Easy-Fur™ is an entangled polymer net furring strip that creates a cutting edge rainscreen and venting system behind wood and fiber-cement siding. Easy-Fur's design allows for the fastest installation on the market, because it can be rolled and easily cut to length.

Applications Include: Wood Siding, Metal Siding, Fiber Cement Board Siding, Other Roofing & Wall Applications
